- Outsourcing trends in the UK FMCG sector

- Existing logistics spend, services and geographic coverage
- Current satisfaction levels, service provision and contracts
- Supply chain operations – DCs, fleet sizes, attributes, RFID
- Future service requirements
- Strategies and planned developments

Detailed strategic research based on surveys of customers with a logistics spend between €100 and €300 million per annum:

Contacts and key decision-makers

Who is responsible for the logistics budget, who makes the decisions for logistics in terms of structure and outsourcing?

Annual expenditure on logistics

What share is outsourced; which operations or services are in-house or outsourced; why are these services in-house /outsourced; how much is domestic/international?

Terms of logistics providers' contracts

How satisfied is the company with their current logistics providers; when selecting a logistics provider what is their most important criteria?

Future strategies and service requirements

Are there any changes to the structure of logistics outsourcing; when are these changes due? How will logistics requirements change in the next five years? Which logistics operations would clients outsource if they didn't feel logistics providers cannot adequately support; what is the single most important issue facing supply chain companies?

Manufacturers operations and facilities

How many DCs are operating; will this change; where are the DCs located; how many loading bays; size and structure of vehicle fleet; which truck manufacturers are used; which tyre manufacturers are used; what are the plans to implement technology like RFID?

"We want to consolidate the number of providers for the whole of Europe, as business levels across Europe are increasing."
